

# TEXAS IN TYPE.

## TEXAS CROPS AND WEATHER.

A good rain fell in Cook county Monday, which insured the crops and revived everything that had begun to droop from the heat.

Mr. F. Lewis of Archer county has thirty-five acres of corn that he thinks will average forty-five bushels per acre.

Another county had a good rain Sunday and the corn crop will be good if it does not get any more rain.

The Taylor Democrat says Mr. C. T. Palmer raised a tomato which weighs one pound and measures one inch in diameter.

It is estimated that the cotton in Rockwall county will make three-fourths of a bale of cotton per acre.

One of Red county's farmers made over \$100 on his oat crop this year.

Mr. G. W. Trappay, a Jones county farmer, made thirty-five bushels of wheat per acre on some land which was broken up last year.

The wheat and oat crops of Childress county are very fine this year. Mr. E. Howard's oat crop averaged eighty bushels per acre.

Elsewhere crops are beginning to account for the rain last week. Corn will be good. There are plenty of roasting ears now.

Kaufman county had a fine rain Monday, which was much needed in some localities. The prospects were never so favorable for crops.

Mr. R. H. Hixie has threshed his oats; has 500 bushels. The low had an average of seventy bushels per acre.

Queen City, Cass county.—Fine rains throughout this county of Cass county this week and crop are fine.

CLARENCE, JOHNSON COUNTY, June 30.—The rain yesterday and Sunday seemed to be general all over the county, and the farmers are jubilant over the present outlook.

CLARKSON, ANNE ARBOR COUNTY, July 3.—Crops are said to be the best throughout this county for ten years. Cotton and corn look well and melons are making their appearance to the delight and sorrow of many small boys, and later ones.

HINES, CASE COUNTY, July 3.—The weather is fine now, and crops of all kinds are growing as fast as possible since the rains set in. Corn is as good as the land can make it. It has been properly weeded, and cotton is doing well. Every body is feeling good over the prospect for good crops.

GREENVILLE, HUNT COUNTY, July 4.—Shut out today at \$2.50 per 100 bushels last year, corn at 20 cents per bushel, and wheat at 15 cents per bushel.

ESTACADO, COCHISE COUNTY, July 3.—Crops are very fine around Estacado. Wheat, oats, barley and rye are just being harvested with a good yield. The milo maize, corn, sorghum and millet crops were never four times better. Our people are all in good spirits and the country is rapidly settling up with good, moral citizens. Fruit and vegetables are fine as can be found East.

TAYLOR, WILLIAMSON COUNTY, July 1.—Farmers are pleased with the fine corn crop. Cotton needs rain. The Taylor Democrat is at work all day. During the season it has been very dry, and farmers are made for a while in not getting last fall. It is estimated this county alone has \$25,000 by looking out. There is still over two thousand acres of corn in unusually heavy, and the new crop will perhaps be marketed at about 20 cents per bushel.

GAIL, BOHLEN COUNTY, July 1.—A fine rain fell in the eastern and southern portions of the county yesterday morning. Grass and water are plentiful.

WILLS POINT, VAN ZANDT COUNTY, July 1.—Good rains recently fell here. Crop prospects are good.

HAMILTON, HAMILTON COUNTY, June 30.—Reports from the country generally, extended over the country generally. Some corn, especially late planting, was too far gone to be benefited. About two-thirds of the county will be greatly benefited as to the corn crop. Cotton had not yet suffered.

COMANCHE, COMANCHE COUNTY, June 29.—A splendid rain fell here this afternoon, accompanied with considerable wind and some light hail. No damage was done, however, of importance as far as heard from. Rain was badly needed. Farmers were beginning to feel blue about corn prospects. This features plenty of corn and everything else.

COOPER, DELTA COUNTY, June 30.—We had a considerable rainfall yesterday evening. There was considerable hail about six miles northeast from town. Crops are fine.

DAKOTAH, DAKOTA COUNTY, July 1.—Fine rains continue throughout this county and farmers are jubilant over a high crop of both corn and cotton, as the prospect for the season is very bright. Several thousand bushels of the oat crop, which was fine, with a fine fruit crop of all kinds. Farmers are well up with their work.

GARLAND, GARLAND COUNTY, July 1.—Garland county, which is a very rich county, has a fine crop of corn and cotton. The outlook for cotton was never better. The farmers continue to haul wheat in at 20 cents per bushel. Several thousand bushels have been marketed here already. We need and will have a bank to help handle the 10,000 bushels of cotton that will likely be marketed in this year.

ATHENS, HENDERSON COUNTY.—The crop prospect of this section is fairly good. The oats crop, which has been gathered, is very fine. The corn crop promises to be a fair one, and with a good rain within a week will be heavy. The cotton crop, too, promises well and is in fine condition as to cultivation. Apples, peaches and berries are beginning to come in. A week of proper facilities, but little shipping at present—the rates eat up the profits. Watermelons are beginning to come in.

EVANS, CORVELL COUNTY.—The farmers are jubilant over the fine prospects for crops. The corn crop is an assured success. Wheat and oats are better than ever known before.

MEMPHIS, HALL COUNTY.—We have noticed in THE GAZETTE that the wheat crop from Wichita Falls to Childress is fine, and we have been meditating to see if the reason could present itself to us, why the reporter did not come one county further, for Hall county has fine wheat as well as other crops in proportion, and we do feel left out as far as getting the people know our resources when we are left out in such a way as that.

CHANNING, HARTLEY COUNTY, July 1.—Ice showers have visited us the last two days. Some fine wind, alfalfa and flax seed in this county were brought in today, grown by an enterprising farmer on the prairie. The samples were excellent, especially the wheat and flax. Mr. Howe from Dallas, in Moore county, has also here today and reports his crops and vegetables never better. The corn is especially fine this year. Mr. C. Reynolds on the L. B. ranch is shipping this week 200 bushels of peaches, which he reports are a very heavy crop this year.

CLAUDE, ARMSTRONG COUNTY.—Wheat harvesting is progressing nicely. The wheat far above expectations, both in yield and quality. Some fine pieces of late wheat are damaged by the rust.

UTAHMAN, YOUNG COUNTY.—As to crops a general soaking rain was a great benefit. As it is corn will be the best in most localities, but badly damaged by the rust and the southeast part of the county. East of our farmers had quit May wheat.

for Mediterranean, but this year John Putman laid out one bushel in all of making thirty-five bushels to the acre on his May wheat, while last year his neighbor, John Dixon, made thirty-five bushels to the acre on that variety. Thus, you see, it would take some of the blizzard Panhandle counties to beat that on a small wheat.

Lancaster, Dallas County.—We have had good seasons in most of the surrounding country. Crops are reported as doing well where rain has fallen, but suffering in the few spots where there has been too little precipitation. Taking the whole surrounding region, corn will be little below an average crop. Wheat is good, but hardly up to expectation. Oats are thriving from thirty to fifty bushels, and the area is less than usual.

Plainview, Hale county.—Wheat harvesting has commenced in Hale county, and the yield is from ten to twenty bushels per acre. Marsalis & Groff have purchased a threshing machine, oats, barley, sorghum, millet, etc. They say there will be 15,000 bushels of the kinds of grain this year. Everyone who is also will plant wheat this fall. One man will put in 500 acres. Others will plant from forty to 200. It is believed by everybody that the plains country will soon be the best wheat section of the state.

A mixed carload of fruit and vegetables was shipped from Sulphur Springs to Chicago last Wednesday. There were no mid-western fruits and vegetables were packed in boxes and shipped by the farmers.

Mr. Spencer, a Wichita county farmer, threshed 43 bushels of wheat of thirteen acres of ground.

The Santa Anita News has the following crop reports: Mr. C. Ashley's wheat averaged a little over twenty bushels per acre. B. P. Jones' wheat averaged between twenty-five and twenty-six bushels per acre. G. W. Saunders' wheat averaged over thirty bushels and his oats averaged seven to seven bushels per acre. Mrs. E. W. Oliver's wheat averaged between twenty-three and twenty-four bushels per acre. W. C. Holt's wheat thirty bushels and his oats twenty bushels. Oscar Gray, on the bayou, wheat twenty-nine bushels and oats over one hundred bushels per acre.

The recent rains have caused a great crop of cotton in the almost tropical luxuriance. Many of the banana trees are setting on fruit loads. Watermelons are being shipped from Alvin by the carload.

Mr. F. Y. Hilla, Childress county farmer, has a yield of about 100 bushels of Irish potatoes per acre. W. H. Brown's oats yielded seventy bushels per acre on sod ground.

Crops in Bastrop county are looking fine, but in the middle and northeastern part they are needing rain.

The wheat crop of Comanche county is turning out as well as expected. Some one area. Among the crops we have heard from is J. W. Cunningham, fifty-one acres, twenty-two bushels per acre; Thomas Harris and A. C. Roberts, fifty-seven acres, twenty-four bushels per acre; D. T. Long, fifteen acres, twenty-three bushels per acre. Pioneer-Exponent.

The Vernon Call says: Lucius Smith, who lives on Wauder's creek, has threshed his wheat, which averaged twenty-five and one-half bushels per acre.

The rain in Colorado county last week was of great benefit to the crops. It had come ten days earlier it would have made an immense crop, but as it was it will make a good crop. The cotton crop is now very promising.

The first carload of wheat ever shipped from Dumas came over the Wichita Valley Tuesday.

Mr. Davis, a farm owner south of Bowie, has a place of land 340 acres on which he has planted about thirty bushels of berries. Mr. Davis will gather 200 quarts this season for which he gets 10 cents per quart.

John E. Kee, who lives seven miles west of Bowie, has raised 27 bushels of improved early red fish on one acre of ground. At the present market price, 60 cents per bushel, Mr. Kee has realized \$1,620 from one acre.—Cross Timbers.

The shower Monday was a blessing to the farmers of the county, and was a blessing for the crop. The rain was 2.10 of an inch. J. A. Cox, east of Iowa Park, has threshed his wheat, which averaged thirty-one bushels to the acre, one bushel yielding thirty-nine bushels per acre.

THURSDAY, STANTON COUNTY, July 5.—A continued rain here at 5 o'clock this morning, and is still raining at 5 p. m. The ground is thoroughly wet. This insures, so far as rain is concerned, one of the best crops in the East Texas land for a number of years, also a good prospect for a cotton crop. Some bold words, however, have been discovered.

Bonham has purchased the Fannin college property for public school purposes.

The catalogue of the Fort Worth university for 1891 is now ready. The university is in a flourishing condition, has beautiful grounds and well-equipped buildings, fine library, literary societies, museum, etc. The enrollment the past session was 150. Fall term opens September 8.

The first catalogue of the polytechnic college of the Methodist Episcopal church, South, Fort Worth, has just been issued. The first term will open September 14. The college has a fine faculty, and the course of study is comprehensive and thorough.

GRANBY, HOOD COUNTY, July 1.—The city of Granbury voted the school tax yesterday by twelve to one. The contract has already been let to erect a building to accommodate 400 pupils. With the college that has been established for several years and the graded school now being organized, Granbury's educational facilities will be complete.

Jacksboro, Jack county.—The property of the Jack County educational institute, a school of several years, has by donation been transferred to the North Texas Baptist college, now permanently located in Jacksboro. The plans for improvements on the present building have been received from the architect, and material is being raised on the ground to carry out the designs which will increase the seating capacity to accommodate about four hundred students. The improvements will cost about \$4000 and will be pushed to completion.

The architect is designing plans for a new building to be erected in 1892 of the blue limestone, of which we have an abundance, and easily accessible. The building to cost not less than \$20,000. Both buildings, when completed and furnished with improved fixtures and apparatus, will have cost more than \$40,000. Some fine thorough scholars of experience will be placed in the chair of any professorship. We extend a cordial invitation and welcome to all who wish the advantage of good school and healthy locality combined to come and dwell among us. You can find no better place.

Lancaster, Dallas County.—A charter for Lancaster female institute has been applied for. Plans and specifications are in preparation. Three thousand dollars has been already raised, and the good work goes on.

The district conference of the M. E. church convened at Liberty Wednesday, the 1st. The conference was well attended and the business session was successful.

The protracted meeting at Wolf City is increasing in interest. Up to the 21st five conversions and eleven additions to the church had been made.

QUAHQUAH, HARDEMAN COUNTY.—The following new enterprises have been secured by Quahquah within past few weeks: Cement works, a college for young ladies, waterworks, an electric light plant, an ice plant and a brick factory.

The Odd Fellows are making arrangements to rebuild their lodge at Black Jack Grove, which was burned last Monday.

CLAUDE, ARMSTRONG COUNTY.—Wheat harvesting is progressing nicely. The wheat far above expectations, both in yield and quality. Some fine pieces of late wheat are damaged by the rust.

UTAHMAN, YOUNG COUNTY.—As to crops a general soaking rain was a great benefit. As it is corn will be the best in most localities, but badly damaged by the rust and the southeast part of the county. East of our farmers had quit May wheat.

The new building will be 24x60 feet, two stories high.

Work has begun on the new windmill, tank and private waterworks of Messrs. Meyer, Rutledge and Harper at Runge, Kansas county. The ice house of the Lone Star brewing company.

The contract has been let for the new hardware store of Messrs. Alfred Tipton and G. H. Heberer. The building will be 35x50.

Aradua, Brazoria county, will have telephone connection with Galveston by September 1. Thirteen new dwellings are being erected on Hall's bayou, three and a half miles southwest of Aradua.

The contract has been let for the bank building at Dallas and work will be commenced in a short time.

The large and elegant rock building of Mr. I. B. Clark of Navarro is nearing completion and will be ready for occupancy by the 10th.

The material is being put on the ground for Mr. McNeill's two brick stores at Fairfield, Freestone county. They are to have iron fronts and will be very neat buildings.

The volume of business in the building industry in Aransas Harbor continues with a rapidly perceptible increase. As soon as the workmen have finished one building there is another projected which requires their services, and thus the work of improvement goes steadily on.

Mr. J. F. Cooper began on Monday the erection of a fine two-story dwelling near the new houses of Niklass & Ismet. It is being pushed rapidly to completion.

Mr. A. McNeill has today the erection of a stone building just opposite the depot, on the bay front. It will be occupied by Mr. McNeill, who will carry on a grain, feed and general commission business. The location was selected for convenience in making and receiving railroad shipments.

The store building of Mr. Slocum on Commercial street is receiving its finishing touches and is occupied by a considerable portion of Mr. Slocum's grocery stock.

The stabled glass is being put into the front of Mr. George W. Lewis' new building on Houston, and will add to other good architectural features in making it a very attractive building.—(Aransas Harbor Herald).

The work of erecting the car works at Beaumont has begun. The foundation of five of the main buildings are in. A large force of men are at work.

The work on S. W. Rice's stone building has begun. It will be 40x20 feet. The front will be magnificently finished and will have a staircase opening in the center.—(Moody Courier).

TEXAS MILLS AND FACTORIES.

Mr. Fred Warmholz is making preparations to start a flour mill at Paris.

DENISON, GRAYSON COUNTY, Tex. July 1.—A large meeting of citizens was held at the city hall to-night to act on the proposition of J. M. Dimech of Chattanooga, Tenn., who proposes to establish a cotton file factory in Denison, with a capacity of 25,000 files per day. He proposed to put in a \$50,000 plant on condition that the citizens loan \$20,000 for three years at 10 percent interest, and take the bonds of the concern for security. The proposition was accepted, and most of the loan subscribed at the meeting.

CLAWSON, ARAPACHO COUNTY, July 1.—This section is largely interested in cotton-baling business. Some very fine mills are located in this county. Clawson has a capacity of 75,000 files per day and in full blast. They have planers and general machinery for most any kind of wood work.

Lancaster, Dallas County.—Moffitt & Brady have the buildings for their new gin completed and are rapidly placing machinery in position. The capacity is to be a bale every fifteen minutes.

MADISON COUNTY, July 2.—Good rains are in sight in various portions of the county every day, yet this neighborhood is very dry. The cotton crop is very fine, the best for years.

VENOX, WILBARGER COUNTY, July 4.—Yesterday was consummated a sale that will be of inestimable value to Vernon. Owing to a disagreement in a settlement between Messrs. Dyer & Kell of the latter place, they have been closed down for several days in liquidation, greatly to the disadvantage of the Vernon people and the surrounding country. Mr. Robert Houston and R. M. Kell have purchased the interest of C. M. Brins in the mills, and they will be started up again at once, and run the full capacity, 200 barrels per day. The Pennsylvania mills have always had an enviable reputation in Texas and New Mexico, Colorado, Kansas, and, in fact, wherever the flour was used it gave more than satisfaction. The previous reputation of the mills will be kept up. The new men are by no means novices at the business, and having plenty of capital, there is no fear but that the mills will be conducted in a proper manner.

Mr. J. W. Earlgrove has purchased the steam and other machinery of D. E. Brown, and will tear down the machinery preparatory to moving it to his premises several miles east of town. Several brick buildings are to be erected in Childress this summer.

The factory at Canadian is running. A lot of new machinery has been added this year, and it has a capacity of two and one-half tons a day.

Mr. A. T. Manning of Childress commenced work on the brickyard a week ago, and is now busy making bricks. Several brick buildings are to be erected in Childress this summer.

Dr. Hendricks and Miss Connie Hemp-hill, Georgetown, June 30.

Mr. J. M. Burford and Miss Pattie McGraw, Weimar, July 1.

Mr. J. N. Pugh and Miss Claude Shannon, Sherman, June 29.

Mr. Frank L. Deane and Miss Ollie Peck, Canadian, July 1.

Mr. B. L. Deane and Miss Lucy Jane Guy, Quintana, June 30.

Mr. A. H. Harris and Miss Mary Ann Taylor, Luling, June 29.

TEXAS NEWS AND NOTES.

TIMPSON, SHELBY COUNTY, July 5.—Mrs. Rhodes, a very old lady, died here yesterday.

WORTHAM, FREESTONE COUNTY, July 5.—Mr. J. O. Longbottom, an old and highly respected citizen of Wortham, died yesterday. All three of his children are living in the neighborhood. Mr. Longbottom had been an intense sufferer for a month or more with typhoid fever complicated with flux. His

TEXAS JOURNALISM.

Messrs. Harry Hutchings, B. W. Hunter and George W. McDonnell have organized a stock company for the purpose of starting an afternoon paper. They have secured exclusive franchise of the afternoon associated press, and propose to publish a paper that will reflect credit on the Capital City.

All three of the gentlemen named are experienced newspaper men, and the fact that they are associated with the enterprise inspires confidence at the beginning that it

## SCRATCHED 28 YEARS

A Scaly, Itching, Skin Disease with Endless Suffering Cured by Cuticura Remedies.

If I had known of the CUTICURA REMEDIES twenty-eight years ago, it would have saved me \$2000 and an immense amount of suffering. My skin was covered with a scaly, itching, and a spot larger than a cent. It spread rapidly all over my body, and not under my nails. The scabs would drop off of me all the time, and my suffering was endless, and with-out relief. One thousand dollars would not tempt me to have this disease over again. I am a poor man, but feel rich to be relieved of what some of the doctors said was incurable. I have made my skin clear and free from scabs and scales. All used of Cuticura and Cuticura Soap, and said you would have cured me for \$2000. You would have had the money. I looked like the picture (No. 2) page 4 of your book—'How to Cure Skin Diseases,' but now I am as clear as any person could be. Through the force of my Cuticura, I have made my skin clear and free from scabs and scales. I am a poor man, but feel rich to be relieved of what some of the doctors said was incurable. I have made my skin clear and free from scabs and scales. All used of Cuticura and Cuticura Soap, and said you would have cured me for \$2000. You would have had the money. I looked like the picture (No. 2) page 4 of your book—'How to Cure Skin Diseases,' but now I am as clear as any person could be.
